

Competitor One-Way Radio Communication

Speedway NZ has registered a frequency to be used for the competitor's one-way communication with the Referee. This frequency is 455.056250 Mhz.

This frequency is able to be used at all SNZ tracks where one-way radios are being utilised, therefore an approved device once purchased can be used at all tracks.

Approved Devices:

Harris Race Radios

The supplier of these two units is Harris Communications in Wellington. Contact 04-9023553 or rex@raceradios.co.nz

The information on setting up the receivers can be found here:

<http://www.harrisraceradios.com/speedway-one-way-monitor-programing.php>

Both devices can be purchased from the Harris website found [here](#)

RaceCeiver 1600 Legend +AU

This model of USA device has been especially modified to meet the NZ law on approved frequency's and can be tuned to the SNZ approved track frequency. Other models of RaceCeiver are not approved for use in NZ.

The suppliers of the Legend +AU model are:

Cardwells www.cardwells.co.nz

Edge Parts and Performance sales@edgeparts.co.nz
